

Annex 4: DESCRIPTION OF GOOD PRACTICE

The aim of annex 4 is to get detailed and structured information on good practices identified within INTERREG IVC projects. Since this information will directly feed into an on-line good practice database to be made available on the programme website, we would be grateful if you could ensure the good quality of the information provided. In particular, this information should be well written and easily understandable for external readers. One good practice can be described per form. There is no limit on the number of good practices that can be submitted, but a minimum of four good practice descriptions are required over the project's lifetime. Annex 4 is submitted together with the progress reports.

N.B. See Programme Manual section 1.1 for the programme's definition of a good practice

1. PROJECT INFORMATION

1.1 INDEX	0575R2
1.2 PROJECT ACRONYM	B-TEAM
1.3 PRIORITY	2: Environment and risk prevention
1.4 PROGRAMME SUB-THEME	Cultural heritage and landscape

2. GOOD PRACTICE INFORMATION

2.1 Title of the practice	Industrial Heritage as Driver for Regeneration			
2.2 Topic of the practice <i>Please specify the precise topic of the practice in a few words (e.g. support to SMEs, demographic change, e-governement, risk management, water scarcity, renewable energy).</i>	This topic promotes the city's industrial heritage as driver for redevelopment of an area which has a very important heritage value.			
2.3 Location of the practice	Country	ES		
	NUTS 1	SUR		
	NUTS 2	Andalucía		
	City	Sevilla		
2.4 Start date of the practice (and if applicable, end date)	Start	01/06/2011	End	

2.5 Detailed description of the practice

Please provide a detailed description of the practice itself. The description should include information on the nature of the practice, its objective, the main stakeholders involved (including the beneficiaries) and the financial resources required for its implementation. If known, please also indicate key success factors and conditions for potential transfer.

In Sevilla the importance of industrial heritage is known and valued. Research was undertaken and valuable buildings and artefacts related to the industrial past were documented. Key element of this research included an assessment of the potential benefits of retaining the historic structures. A book containing all the historical buildings and structures was produced; it was then used at a strategic level to prioritise the importance and conservation status of these buildings. They were integrated in the Industrial Heritage Trail of the city that will show tourists a different side of Sevilla and will raise the awareness regarding industrial and cultural heritage.

2.6 Evidence of success

Please explain why this practice is considered as good. Objective result and/or impact indicators are welcome in this section to demonstrate the success of the practice (e.g. n° jobs created or safeguarded, n° of patents submitted, amount of tons/year of freight traffic withdrawn from road, % of greenhouse gas emission reduced).

In this good practice example, the city of Sevilla has provided guidance for investors and other stakeholders and is now more flexible regarding the end use of these buildings and whether or not they should be retained. It shows that industrial heritage can play an important part in increasing a unique identity for an area and contributes to local distinctiveness by linking a place with its industrial past.

2.7 Contact details to obtain further information on the practice

Name	Pedro Maestre Sanchez
Organisation	Sevilla Global
E-mail	pmaestre@sevillaglobal.es
